PROFESSIONAL EXPERIENCE

Highspot
Product Designer II

Nov 2024 — Present
Hyderabad, India

- Led onboarding and setup design for the Meeting Intelligence product, **improving successful meeting ingestion rates from 68% to 96%**.
- Designed integrations across Outlook, Teams, PowerPoint, and DocuSign, **driving 53.4% growth in monthly active users** for Highspot for Outlook.
- Led design for **AI-powered Salesforce, Agentforce, and Slack integrations**, surfacing meeting insights and deal recommendations directly within seller workflows.
- Shaped company-level administration and configuration experiences, enabling enterprise customers to manage integrations, AI capabilities, and product features at scale.
- Influenced roadmap decisions, presented design strategy to senior leadership, and drove cross-functional alignment across product and engineering teams.

NCR Voyix
Senior Product Designer

Sep 2019 — Jan 2024
Hyderabad, India

- Led end-to-end design for a retail back office application and restaurant-focused Kitchen Display System, contributing to **10 enterprise customer deployments** across North America, EMEA, and APAC.
- Architected a shared design system comprising **75+ reusable components and patterns** for the web, standardizing experiences across multiple retail back-office products and accelerating design and development workflows.
- Partnered with research and accessibility teams to validate flows with users and ensure WCAG- and ADA-compliant interfaces.
- Identified usability gaps for the Kitchen Display System product through heuristic reviews, then drove UX research in collaboration with the research team; resulting redesigns **improved task completion by 60%**.
- **Facilitated 15+ design system workshops** across product and engineering, and mentored **4 designers**.

RapidBizApps
UX Designer

Aug 2018 — Aug 2019
Hyderabad, India

- Led the design of a safety-focused enterprise product, enabling field workers to prioritize and execute safety protocols through intuitive workflows and accessible interfaces.
- Produced detailed design specifications — flows, wireframes, and responsive layouts — for industrial and mining environments where interface clarity directly impacted worker safety.
